Notes:	ITEM QTE # PIECE DESCRIPTION ITEM QTE # PIECE DESCRIPTION
1. Operating pressure between 90 to 120 psi	1 80 AIRHOS0047 Black Nylon DOT air brake tubing 3/8" Dia 10 1 AIRVAL0007 240-B, 108-4 = EXTERNAL SEAT DRAIN VALVE 1/4"
 Air brake circuit is in a seperate diagram Electrical components are in seperate diagrams 	2 1 AIRVAL0072 90054007 = LEVELING VALVE 11 1 AIRVAL0011 AIR PRESSURE REG. VALVE ASSY PANEL MOUNT
4. The air lift managment is done with an RM-60 system or EKAD system	3 1 AIRVAL0502 ADJUSTABLE LINK,8"-15",2RUB. BUSHING 1/4HOLE 12 1 AIRVAL0019 KN32011 = QUICK RELEASE VALVE IN1/2-OUT3/8
5. Manual "TMA0022 - Caster steer air lift" explains in detail the suspension ratio valve and air lift system	4 1 AIRVAL0045 WM778A1 = PRESSURE PROTECTION VALVE W/FILTER* 13 2 FITBRA0236 BBV-C = AIR VENT, 3/8 NPTM 300PSI (FILTER)
6. Usually axle steering lock needs air pressure to unlock. If the locking system is revered, flip the NO	5 6 AIRVAL0024 BV4103B, BV-04 = BRASS BALL VALVE 1/4 NPTF 600WOG. 14 1 SUSSPG0507 Rubber S-12335 = AIR BAG, CL "T" SUSP. HTBL 0 0 AIRDALIZACIÓN CONTRACTOR AND
and NC connection on AIRVAL0046	6 2 AIRGAU0001 LIQUID AIR GAUGE 1/4 BACK 2.5" 0-160 15 2 AIRBOX0017 RA001P-141206 CONTROL BOX EMPTY, PLASTIC 14 X 12"
Operational Characteristics:	7 1 AIRVAL0119 RA723-6 = 3 WAY BALL VALVE, PORTS 3/8 NPTF. 16 1 AIRVAL0039 RELAY VALVE TYPE NO 3 WAY 10-30PSI to activate 2 4 AIRVAL014 EXECUTED 100 W/ MANUAL EXECUTED 100 W/
 Drain air tanks daily to prevent the buildtup of moisture in the system Dump valve in control box dumps all air ride air bags 	8 1 AIRVAL0120 5 PORT SPRING RETURN SOLENOIS W/ MANUAL EXT. PILOT 17 1 AIRTAN0004 24.38L Air Tank 9.5" X 22.5" 27.5"OAL 9 1 AIRVAL0046 90554615 = PILOT VALVE, 1/4NPT-1/8NPT 18 1 AIRVAL0041 WM318A - RATIO RELAY VALVE MODEL TYPE, N.C
3. When the air lifts are lifted, the braking signal is halted to eliminate flat spots on tires	9 1 AIRVAL0046 90554615 = PILOT VALVE, 1/4NPT-1/8NPT 18 1 AIRVAL0041 WM318A - RATIO RELAY VALVE MODEL TYPE, N.C
 The air lifts can also be controled manually Optional ball valves on air bags are to shut off the air supply in case of a failure

Lifting air bag Empty To supply*	
Suspension air bags To leveling Empty (11)	
*In case of a UBL system (bags on suspension arms)	
regulator must be used to limit the operating pressure	
untill the suspension can lift itself. If pressure is too high, the brackets will be bent!
